Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

Claims 1 – 16 and 33 – 64 are allowed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 17 – 18, 20, 23 – 26, 28 – 29 and 31 – 32 are rejected under 35

U.S.C. 102(e) as being anticipated by U.S. Patent Application No. 2003/0086541

(Brown et al.).

Brown teaches the claims of the instant application as shown in the following paragraphs 0002 - 0003, 0021 – 0026, 0031, 0033, 0035 – 0038. Also, note Table 4 and Figs.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2642

Claims 19, 21 – 22, 27 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al.

With respect to claim 19, since Brown et al. teach energy detection and since guard band is something that is instituted by a use, it would have been obvious to one of ordinary skill to eliminate it wherever necessary.

With respect to claims 21 – 22, 27, and 30, Brown does not show all the parameters, indications, commands and applications as claimed in the groups as shown above, however, it would have been obvious to one of ordinary skill to add these other well known parameters or indications to the instant groups.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note Abstracts and Figs. of the references as shown on the 892 contained herewith.
